Part III DETAILED ACTION

Specification

1. This office action responsive to communication filed 04/19/2003. Applicant's election without traverse of claim 8 in the reply filed 04/19/2003 is acknowledged. Claims 8-10 are presented for examination. Claims 9-10 are newly added. Claims 1-7 have been withdrawn.

2. Applicant is reminded of the duty to fully disclose information under 37 CFR 1.56.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 8 is rejected under 35 U.S.C. § 102(b) as being anticipated by Hall et al. (USPN: 5,418,916), hereinafter Hall;

Art Unit: 2186

As per claim 8, Hall discloses the invention as claimed including a method in which data for multiple snapshots is maintained without redundancy of preserved data for different snapshots in data storage comprises determining whether a granule of a volume requires caching prior to being overwritten; and saving the granule of the volume prior to being overwritten if it needs caching (e.g. see column 2, line 61 bridging column 3, line 52).

Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hall et al. (USPN: 5,418,916), hereinafter Hall;

As per claims 9-10; Hall discloses the invention as claimed, detailed above with respect to claim 8; Hall however

Art Unit: 2186

does not particularly disclose a computer-readable medium comprising of computer instructions to be implemented a method as being claimed in claim 8. However, one of ordinary skill in the art would have recognized that computer readable medium (i.e., floppy, cd-rom, etc.) carrying computer-executable instructions for implementing a method, because it would facilitate the transporting and installing of the method on other systems, is generally well-known in the art. For example, a copy of the Microsoft Windows operating system can be found on a cd-rom from which Windows can be installed onto other systems, which is a lot easier than running a long cable or hand typing the software onto another system. The examiner takes Official Notice of this teaching. Therefore, it would have been obvious to put Hall's program on a computer readable medium, because it would provide software control for the hardware; in addition, it further facilitate the transporting, installing and implementing of Hall's program on other systems.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
